Professional Summary

Computer Science undergraduate with strong foundations in Java, Data Structures & Algorithms, OOP, DBMS, and backend development. Experienced in developing applications using Java, Node.js, REST APIs, JDBC, MySQL, and MongoDB. Familiar with AWS, Docker, Linux, and Git, with a focus on problem-solving and building reliable software solutions.

Education

KL University Jul 2023 – May 2027
B.Tech in Computer Science and Engineering GPA: 9.01/10
Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Computer Networks, Human Computer Interaction, Software Project Management, Software Engineering
The Narayana Group Sept 2021 – May 2023
Intermediate Education 93%

Technical Skills

Languages	Java, C, SQL
Core CS	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Backend	Node.js, Express.js, REST APIs, JDBC
Databases	MySQL, MongoDB
Cloud & DevOps	AWS (EC2, S3), Docker, Linux, Git
Tools	GitHub, Postman, VS Code, IntelliJ IDEA

Certifications

- Microsoft Certified: Azure Fundamentals (AZ-900)
- AWS Certified Cloud Practitioner

Projects

AI-Enhanced Honeypot and Deception System

Node.js | MongoDB | Linux | Git

- Engineered an AI-enhanced honeypot to detect suspicious network activity and capture real-time security events.
- Designed REST-based backend modules for processing and storing security logs using MongoDB.
- Implemented modular architecture and optimized database operations for scalable event handling.
- Collaborated using Git and followed clean coding practices to deliver maintainable backend components.

Secure Fitness Tracker

Java | JDBC | MySQL | REST APIs

- Developed a backend application for user authentication, workout management, and profile operations.
- Implemented input validation and exception handling to improve application reliability.
- Designed MySQL database schemas and used JDBC for database connectivity and data management.
- Applied OOP principles to create modular and maintainable application components.

Achievements

- Finalist, Cyberyaan Workshop.
- Qualified for Phase 3 of DEVTrails University Hackathon.
- Collaborated with a multidisciplinary team during Smart India Hackathon 2025 to design and prototype innovative software solutions under strict deadlines.
